10th September, 2023

In Depth Interaction for Integrated School Health Program and
Forthcoming Zonal SAHS Training /SAMA Conferences

Obstetricians and Pediatricians are really one unit when offering perinatal care that determines the quality of the newborn, infancy and early childhood having farfetched influence into the rest of their lives.... It is imperative for obstetricians to look into the multifarious issues beginning from early pregnancy to perinatal conditions that have to be finetuned to beget an offspring with optimal outcome not only during its neonatal period but also infancy and early childhood. All very fine. However how many of us obstetricians and pediatricians look further into the fourth dimension of perinatal period.

Many forums in this globe both within and outside the country have not only looked into this dimension but have begun to evaluate the immediate and long-term results. In this event we bring in scientists, obstetricians , pediatricians who look beyond the obvious and hitch their science to the evolutionary forces of humanity... we focus on the forthcoming generation preparing humanity to usher in the 'Wonderful New World ... waiting at our gates for our call'!

If your hearts leap up well ...embark with us in this venture of the "THE NEW CHILDHOOD"..... which should not only be optimally physically healthy but psychologically and spiritually too....make it an integral part of your professional journey.... ENJOYTHE NEW EXPERIENCE.

Program

DAY 1 : 09.09.2023 (Saturday)
